
Liste des hachures

Produits pour l'aménagement

Téléchargez la bibliothèque des hachures !

Les miniatures des hachures présentées dans ce guide facilitent la sélection des hachures pendant l'édition assistée par ordinateur de présentations réalisées à l'aide de logiciels de CAO ou autres logiciels de publications. La bibliothèque des hachures est classée par ordre alphabétique de produits. N'oubliez pas de télécharger la bibliothèque à partir de la page Support du site Internet Permacon pour professionnels.

Les noms des hachures sont divisés en 4 parties séparées par un caractère _. Le nom est suivi d'une lettre qui indique s'il s'agit d'un pavé(P) ou d'une dalle(S). Ensuite une ou plusieurs lettres indiquant la présence de pavés ou dalles de différentes dimensions (exemple ABC). Le dernier code identifie le motif avec une lettre et un chiffre. Le chiffre 1 indique que les joints sont simples. Le chiffre 2 indique que les joints sont doubles.

Si vous avez des questions au sujet de ce guide ou pour un complément d'information, n'hésitez pas à contacter votre représentant ou le service de support technique Permacon directement.
